

MASTERING EMBEDDED SOFTWARE

A three-day workshop of technical sessions addressing key topics of interest to embedded software developers and technical managers.

Dates : 7th,8th & 9th June 2017 | Venue : Bangalore

Organized By

MASTERCLASS OVERVIEW

The Embedded Software Masterclass is a symposium of sessions, each covering a specific technology or technique that is key to the work of an embedded software developer. Many engineers become quite specialized in specific disciplines in embedded software, but there are great benefits to be gained if they have a broader view of all the technologies and can appreciate the big picture. Sessions cover programming techniques and languages, real time operating systems and related technology and broader topics, like multicore system development

WHO SHOULD ATTEND

- Embedded Software Engineers
- Embedded Software Architects
- Project Leads/Tech Leads
- Project Managers
- Embedded Design Engineers
- Head Project Management
- General Managers
- Vice Presidents

INDUSTRIES

- Medical Devices
- Industrial Automation
- Electronics Design
- Automotive OEMs and Ancillary
- Defence
- Aerospace

KEY TAKEAWAYS

- A working knowledge of a variety of embedded software technologies.
- An appreciation of how to get the best out of C and C++ for embedded applications.
- A good understanding of the benefits and capabilities of real time operating systems.

PREQUISITE

- Working knowledge of the C programming language is a must.
