MASTERCLASS OVERVIEW

Organizations that realize and sustain innovation success are differentiated by 11 key activities. These firms have a plan, are relentless in their efforts to ensure the right products / services are being developed effectively and have created supportive and stimulating innovation environments. They know themselves and they know their innovation ecosystems. These companies have set themselves up internally and externally to compete and win and they have done so by mastering the research proven Innovation Framework and ensuring they understand all facets of their external environment.

Attend this Master Class to learn about the Innovation Framework and how your innovation ecosystem can dramatically influence the success or failure of your innovation efforts.

WHO SHOULD ATTEND THIS PROGRAM

- Directors
- Vice Presidents
- Head R&D
- New Product Innovation
- New Product Development
- Innovation Strategy
- Portfolio Management
- Idea to Launch
- NPD Process Owner / Managers

KEY BENEFITS OF ATTENDING

- Develop deep insights on the critical performance innovation framework and how it interacts.
- Explore new techniques to better understand how your innovation ecosystem can impact your product development success or failure.
- Learn why dynamic player response analysis is an emerging critical technique to elevate strategic and tactical decision making success.
